IT Skills

Front-end development

React, Next.js, TypeScript, JavaScript, TailwindCSS, Framer Motion, HTML, CSS, Sass, Zod, Tanstack Query

Testing

Jest, Cypress, Vitest, React Testing Library, Lighthouse

AI Tooling

Claude Code, Codex, Cursor, Github Copilot, multi-agent teams and workflows, MCP servers

Tooling

Vite.js, Git, Storybook, React Hook Form, Node.js, Figma, Solana web3.js, LottieFiles, PostgreSQL, Next-Auth, Vercel, OpenShift

Other programming languages

C++, C#, Python, PHP, ABAP, Bash, SQL

Work experience

Senior Software Developer – SONET (member of Payten)

March 2026 - Present

- Led development of the internal component library: fully covered by tests, CI/CD deployment, and distributed as an npm package to other projects
- Own the decision and rollout of multi-agent AI team workflows (Codex, Cursor, GitHub Copilot), including implementation of the MSSQL databases MCP server and Redmine MCP server
- Own tech-stack decisions for new front-end applications, driving the transformation from legacy stack to React + TypeScript with a focus on security, accessibility and ergonomics
- Front-end development and integration of AI into the SDLC
- Used React, TailwindCSS, Tanstack Query, Storybook, Zod, TypeScript, Radix UI, React Hook Form, Node.js, Vitest and Lighthouse

Front-end Developer – Deutsche Telekom Services Europe

January 2024 - February 2026

- Informally led a front-end team of 4 developers (including self) for a defined period, coordinating task delivery and code quality within the AIS (AI Shared Services) team
- Collaborated closely with data scientists and AI researchers to ship production AI-powered tools
- Designed and implemented an internal component library with Storybook, adopted across the team's projects
- Built and scaled a chatbot application to production for hundreds of users as main front-end developer, owning performance, reliability and UX
- Used Next.js, Tanstack Query, Cypress, OpenShift (see skills panel for shared stack)

SAP BW Software Developer – CVIS BUT, Brno

February 2022 - December 2023

- Data warehousing and BI development supporting 11 faculties and departments of BUT university, working closely with a 3-person database team and university analysts
- Designed and implemented ETL pipelines and OLAP data cubes to structure and process institutional data for reporting
- Used SAP Business Warehouse, SAP Business Objects, SAP BW/4HANA, ABAP and SQLScript

Education

Master's degree (2023 - 2025)

Masaryk University – Faculty of Informatics

Study program: Software Engineering (Design and Development of Software Systems)

Bachelor's degree (2020 -2023)

Brno University of Technology – Faculty of Information Technology

Study program: Information Technology

Freelance projects

Hackathon 2023 event webpage - JINAG, Brno

April 2023 - May 2023

- Created UX/UI design in Figma based on client's requirements. Coded and scaled landing page for a hackathon event in Brno using HTML, SASS, Vite.js, LottieFiles and JavaScript
- Worked closely with a client to meet their requirements

Dny AI 2022 event webpage - Brno.ai, Brno

July 2022 - August 2022

- Created and scaled landing page for an event about the AI based on provided UI/UX design using HTML, SASS, PHP and JavaScript
- Worked closely with UI/UX designer and client

Other projects (most of them are published on GitHub)

CloakForge

- Web3 application for interacting with the Solana blockchain, built to give users a unified interface for common on-chain token and liquidity operations without needing CLI tooling or multiple dashboards
- Implemented core flows: SPL token minting, liquidity pool creation, transaction multisending (batch transfers to many recipients in one operation), token burning, and revocation of token authorities (mint/freeze authority renouncement for trust and security signaling)
- Next.js, TailwindCSS, Typescript, Tanstack Query, Solana web3.js, Framer-motion, Figma

Development of a Front-End Testing Framework: Strategies, Tools, and Implementation (Master thesis)

- Front-end Testing Framework - PDF guide with tech-stack, strategies, pitfalls, code examples how to test modern front-end apps. Covers all testing phases
- Next.js template - ready to use template with pre-initialized testing environments for all testing phases

Statsly.app

- Analytical app with connection to multiple social media platforms with oAuth2. Uses data for analytics and creating media kits
- Next.js, TailwindCSS, PostgreSQL, API, Typescript, Tanstack Query - full-stack app

Personal web

- Next.js, TailwindCSS, Typescript, Framer-motion, Figma

BrainFree v2 - full-stack web app for priority management

- Next.js, TailwindCSS, Typescript, Next-Auth, React-Query, Zod, Figma, team of 3 developers

Foreign languages

English language - C1

German language - A2

Czech language - C1

Certificates, trainings and awards

2023	<u>BUT rector's award for bachelor's studies</u>
2021	Project management module II - IUVENTA (NIVAM)
2020	Project management module I - IUVENTA (NIVAM)
2020	Project management - ZIPCEM
