SUMMARY

Frontend-focused software developer with production experience in React, Next.js and TypeScript. Currently the most experienced frontend/AI engineer at SONET, driving frontend architecture, CI/CD, and a company-wide Redmine MCP server used daily by around 25 people. Previously the unofficial team lead for a 3-person frontend team at Deutsche Telekom. Builds and applies agentic AI tooling (Claude Code, Cursor, GitHub Copilot, custom MCP servers) across the development lifecycle.

SKILLS

Front-end development: React, Next.js, React Native, Expo, TypeScript, JavaScript, TailwindCSS, Framer Motion, HTML, CSS, Sass, Zod, TanStack Query

Testing: Jest, Cypress, Vitest, React Testing Library, Lighthouse

AI tooling: Claude Code, Codex, Cursor, GitHub Copilot, multi-agent workflows, MCP servers

Other tooling: Vite.js, Git, Storybook, React Hook Form, Node.js, Figma, Solana web3.js, LottieFiles, PostgreSQL, Next-Auth, Vercel

Other languages: C++, C#, Python, PHP, ABAP, Bash, SQL

WORK EXPERIENCE

Senior Software Developer – SONET (member of Payten)

March 2026 – Present

- Most experienced frontend/AI engineer at SONET; unofficial ownership of frontend architecture and standards company-wide
- Leading an in-progress migration of the frontend from legacy JS/jQuery to React, TypeScript and Tailwind
- Built an internal component library, shipped as an npm package
- Set up GitLab CI/CD pipelines now adopted across engineering
- Built two code-review agents with global, team, and project-level rules; saves hours of review time weekly
- Built SONET's first Redmine MCP server, letting AI agents handle tickets end to end; used daily by around 25 people
- Technical stakeholder for an AI knowledge-base initiative delivered by an external vendor
- Reviews colleagues' code daily
- **Stack:** React, TailwindCSS, TanStack Query, Storybook, Zod, TypeScript, Radix UI, React Hook Form, Node.js, Vitest, Lighthouse

Front-end Developer – Deutsche Telekom Services Europe

January 2024 – February 2026

- Worked across three main projects: an internal Storybook component library, a customer-facing chatbot application, and a company-wide AI-powered procurement platform
- Acted as unofficial team lead for a 3-person front-end team for 6 months during the chatbot project, which scaled to hundreds of users
- Built a front-end testing framework covering the full testing pyramid
- Created an internal component library with Storybook
- Collaborated with AI experts (data scientists, researchers) as part of the AI Shared Services team
- **Stack:** Next.js, React, TailwindCSS, TanStack Query, Storybook, Zod, TypeScript, Radix UI, React Hook Form, Vitest, Cypress, Lighthouse

SAP BW Software Developer – CVIS BUT, Brno

February 2022 – December 2023

- Worked closely with a 3-person database team and analysts across 11 faculties and departments at Brno University of Technology
- Processed data using SAP Business Warehouse, SAP Business Objects, SAP BW/4HANA, ABAP and SQLScript; built OLAP data cubes via ETL

FREELANCE PROJECTS

Hackathon 2023 Event Website – Brno.ai

April 2023 – May 2023

- Designed UX/UI in Figma to client's requirements; built and shipped a landing page using HTML, Sass, Vite.js, LottieFiles and JavaScript

Dny AI 2022 Event Website – JINAG, Brno

July 2022 – August 2022

- Built and shipped an event landing page from a provided UI/UX design using HTML, Sass, PHP and JavaScript

EDUCATION

Master's degree, Software Engineering (Design and Development of Software Systems) – Masaryk University, Faculty of Informatics

2023 – 2025

Bachelor's degree, Information Technology – Brno University of Technology, Faculty of Information Technology

2020 – 2023

SELECTED PROJECTS

- **CloakForge** – Web3 app for interacting with the Solana blockchain (token minting, liquidity pools, multisender, token burning, authority revocation, wallet info). Next.js, TailwindCSS, TypeScript, TanStack Query, Solana web3.js, Framer Motion, Figma
- **Statsly.app** – Full-stack analytics app connecting multiple social platforms via OAuth2 for media-kit generation. Next.js, TailwindCSS, PostgreSQL, TypeScript, TanStack Query
- **Front-end Testing Framework (Master's thesis)** – Strategies, tools and implementation guide for testing modern frontend apps, plus a ready-to-use Next.js template with pre-configured test environments
- **BrainFree v2** – Full-stack priority-management app built with a team of 3. Next.js, TailwindCSS, TypeScript, NextAuth, React Query, Zod, Figma
- **Personal website** – Next.js, TailwindCSS, TypeScript, Framer Motion, Figma

LANGUAGES

English – C1; Czech – C1; German – A2

CERTIFICATES AND AWARDS

- BUT Rector's Award for bachelor's studies (2023)
- Project Management Module I & II – IUVENTA/NIVAM (2021, 2020)
- Project Management – ZIPCEM (2020)
